2	InstallShield Wizard Completed	٦
	The InstallShield Wizard has successfully installed FLexNETService. Click Finish to exit the wizard.	
192	Vaunch FLexNETService	
-		
	< Back Finish Cance	

If you have received your license file, you can now copy the file to the installation folder. If you do not have a license file, contact your dealer/distributor. You can continue the FlexNET service setup after receiving a license file.

If you started LMTOOLS after the installation was complete you should see the window below. Otherwise you will find it under

"Start", "Programs", "Rasterex", "FLexNETService".

You will now configure the server.

We start with the Information under the "Service/License File" tab. Select Configuration using Services. Then select the tab "Config Services".

	Path to the license file C:\Program Files\Rasterex\Rasterex License Se
	Path to the debug log file C:\Program Files\Rasterex\Rasterex License Se Browse View Log Close Log
Í	Start Server at Power Up

Now do the following:

- ____ 1. Mark "Use Services" and "Start Server at power Up" to have the service start automatically.
- <u>2</u>. Change the path to the license file so it matches the name and location of your license file.
- 3. Save the service.

If you see a question like this, answer "Yes".
